

MICROSOFT OFFICIAL CURRICULUM

Microsoft

Build intelligent applications

AB-410T00

Official Microsoft Learn-aligned instructor-led program for Build intelligent applications.

Cloud

Intermediate

Power BI

DURATION

3 days

LEVEL

Intermediate

FORMAT

Virtual, On-site, or Hybrid

CERTIFICATION

AB-410T00

AUDIENCE PROFILE

Built for these roles

This course is designed for individuals who want to learn how to build intelligent applications using the Microsoft Power Platform and are new to using AI, copilots, and agents in solution design. It is ideal for learners with a general understanding of business processes or app building who want to develop the skills to analyze requirements, select appropriate Power Platform components, and create AI enhanced solutions. The course introduces how AI and agents can improve application behavior, automation, and user experience, while also building awareness of governance and responsible use as learners begin their journey into intelligent app development.

OVERVIEW

Executive overview

This course teaches learners how to design and build intelligent applications on the Microsoft Power Platform by using AI, copilots, and agents to solve real business problems. Learners explore how Power Apps, Power Automate, Power Pages, Copilot Studio, and AI enabled capabilities work together to create agent first, AI enhanced solutions that improve productivity, decision making, and user experience.

PROGRAM OUTCOMES

Capabilities your teams will gain

- Strengthen capability in cloud scenarios
- Strengthen capability in power bi scenarios
- Strengthen capability in role-based scenarios

TALK TO US

OFFICE

ENTERPRISE CUSTOMIZATION

Enterprise customization

Tailor this program to your organization's priorities: Builds current Microsoft credential readiness for Build intelligent applications using the official Microsoft Learn outline.

Customization options

- Align labs to your production environment and platform priorities
- Add readiness reviews and instructor-led practice sessions
- Extend into project-specific architecture or delivery coaching

CURRICULUM

Curriculum roadmap

1

MODULE 1

Get started with AI-first solutions in Microsoft Power Platform

Establish the AI-first mindset and foundational skills you need to build intelligent Power Platform solutions. Learn to apply AI-first design patterns with Copilot, master prompt engineering to work effectively with generative AI, and use AI-powered Plans to translate business ideas into structured solution blueprints.

- Design AI-powered business solutions with Microsoft Power Platform
- Create effective prompts for generative AI training tools
- Turn business ideas into Power Platform solutions with Plans

2

MODULE 2

Build your data model with Microsoft Dataverse

Build the data foundation that intelligent Power Platform solutions are built on. Learn how Dataverse tables and columns work, how to model your business data, apply security roles to control access, and encode business logic directly into the data layer with business rules.

- Create tables in Dataverse
- Create and manage columns within a table in Dataverse
- Get started with security roles in Dataverse

OFFICE

DLF Cyber City, Gurugram
Haryana — India
Azure · AI · Data · Power Platform

3

MODULE 3

Build intelligent apps and portals with Microsoft Power Apps

Build AI-ready apps and portals that surface intelligent, Dataverse-backed data. Create and customize canvas apps, configure model-driven apps for customer engagement, and build data-connected Power Pages portals for any audience.

- Get started with Power Apps canvas apps
- Customize a canvas app in Power Apps
- Publish, share, and maintain a canvas app
- Get started with model-driven apps in Power Apps
- Configure forms, charts, and dashboards in model-driven apps
- Core components of Power Pages
- Explore Power Pages design studio

4

MODULE 4

Automate and extend your solutions with AI in Microsoft Power Automate

Wire your Power Platform solutions with intelligent automation and generative AI capabilities. Create event-driven cloud flows, connect automation directly to your Dataverse data model, build approval flows that route decisions to the right people — then extend your solutions further by generating natural language responses from your own business data with AI Builder grounded prompts.

- Get started with Power Automate
- Use Dataverse triggers and actions in Power Automate
- Build approval flows with Power Automate
- Create AI Builder prompts using your own Dataverse data

PRIVATE DELIVERY
