VENDOR PORTFOLIO

VNode ITeS

36 programs across 9 categories

CATEGORY

AI

5

AI**Azure AI Foundry for Enterprise AI Applications**

This program gives technical teams Azure AI Foundry experience for building production-ready AI applications. Participants work through model selection, prompt flow design, evaluation pipelines, and governance controls needed for enterpris...

Intermediate

2-3 Days

Intermediate

2-3 Days

High Demand

AI**Azure OpenAI & Generative AI Fundamentals**

This program introduces Azure OpenAI Service, core LLM capabilities, and enterprise application patterns. Participants move beyond theory by deploying Azure-hosted GPT models, writing effective prompts for real tasks, and understanding gov...

Beginner

3 days

Beginner

3 days

AI**Enterprise AI Model Selection & Evaluation**

The LLM landscape is fragmented, with GPT-4o, Claude, Gemini, Mistral, Phi, and Azure-hosted options each carrying different strengths, costs, compliance postures, and performance characteristics. This workshop gives teams a structured eva...

Intermediate

2 days

Intermediate

2 days

AI**Advanced Prompt Engineering & LLM Applications**

This program moves beyond basic prompting into advanced patterns for production LLM deployments. Participants build RAG pipelines, apply function calling and reasoning-oriented prompt patterns, and use structured evaluation frameworks to m...

Advanced

2 days

Advanced

2 days

AI

Building Multi-Model AI Pipelines on Azure

This advanced program addresses a production challenge: many AI applications can route simpler requests to smaller models while reserving frontier models for higher-complexity work. Participants design and build multi-model routing pipelin...

Advanced

3 days

Advanced

3 days

CATEGORY

Data

3

DATA

Azure Data Engineering with Databricks

A hands-on data engineering program covering end-to-end pipeline development on Azure, from raw ingestion through transformation to serving. Participants work with Apache Spark, Delta Lake, and Azure Data Factory under real pipeline design...

Intermediate

5 days

Intermediate

5 days

DATA

Azure Synapse Analytics

Azure Synapse Analytics integrates dedicated SQL pools, Apache Spark, Data Factory pipelines, and Power BI into a unified analytics workspace. This program gives participants hands-on experience across ingestion, transformation, querying,...

Intermediate

3 days

Intermediate

3 days

DATA

Microsoft Fabric: End-to-End Analytics

Microsoft Fabric consolidates data engineering, data science, real-time analytics, and BI into a single platform. This program walks teams through the complete Fabric architecture with labs in every session, from workspace provisioning thr...

Intermediate

3 days

Intermediate

3 days

CATEGORY

Power Platform

2

POWER PLATFORM

Power Automate & Power Apps Development

This program helps teams automate repetitive business processes and build lightweight internal applications using Microsoft Power Platform. Content is anchored in real operating scenarios such as approval workflows, data collection forms,...

Intermediate

3 days

High Demand

Intermediate

3 days

POWER PLATFORM

Power BI for Enterprise Analytics

Power BI is Microsoft's leading BI platform, but untrained teams often create fragile, slow, or misleading reports. This program establishes correct data modeling, DAX, and report design practices from the start with labs built around real...

Beginner

3 days

Beginner

3 days

CATEGORY

Cloud

2

CLOUD

Azure DevOps & DevSecOps

This program covers the Azure DevOps and GitHub Actions toolchain, from repository management and automated pipelines to container security and compliance gates. Participants learn to embed security into the delivery pipeline from the star...

Intermediate

4 days

Intermediate

4 days

CLOUD

Azure Architecture & Cloud Design Patterns

This advanced workshop applies the Azure Well-Architected Framework to real architectural scenarios. Participants learn to design for reliability, security, cost optimization, performance efficiency, and operational excellence while workin...

Advanced

4 days

Advanced

4 days

CATEGORY

Software Dev

1

SOFTWARE DEV

.NET Core & REST API Development

Intermediate

5 days

This program covers modern .NET development from REST API design through data access, testing, and deployment. Labs are built around realistic enterprise scenarios, with clean architecture, repository patterns, and .NET practices applied t...

CATEGORY

AI Productivity & Automation

4

AI PRODUCTIVITY & AUTOMATION

Microsoft Copilot for Business Users

Beginner

1 Day

This workshop shows business teams how to use Microsoft Copilot in daily operations. Participants work through high-impact use cases for drafting, summarizing, analysis, and communication to improve productivity and decision support.

Beginner

1 Day

High Demand

AI PRODUCTIVITY & AUTOMATION

GitHub Copilot for Developers

Beginner to Intermediate

1-2 Days

This program helps development teams adopt GitHub Copilot in enterprise development workflows. Participants learn prompt patterns for coding tasks, safe usage approaches, and team standards across implementation, testing, and refactoring.

Beginner to Intermediate

1-2 Days

High Demand

AI PRODUCTIVITY & AUTOMATION

RPA with Power Automate

Beginner to Intermediate

2 Days

This program provides a structured path to implementing business process automation with Power Automate. Participants learn cloud flows, desktop flows, approvals, and integration patterns needed to deliver measurable process improvements.

Beginner to Intermediate

2 Days

High Demand

AI PRODUCTIVITY & AUTOMATION

Copilot Studio & AI Agents

Intermediate

2 Days

Participants learn how to design, build, and operationalize AI copilots and agents using Copilot Studio. The course covers conversation design, business workflow integration, and governance-ready deployment patterns for enterprise environm...

CATEGORY

Microsoft Dynamics 365 & Power Platform Solutions

5

PL-400

Power Platform Developer (PL-400)

This PL-400 aligned program helps developers design and build enterprise-grade Power Platform applications. It covers solution architecture, automation flows, Dataverse implementation, and integration patterns with Azure services.

Intermediate

3-4 Days

High Demand

Intermediate

3-4 Days

MICROSOFT DYNAMICS 365 & POWER PLATFORM SOLUTIONS

Dynamics 365 Customer Service / Sales

This role-focused program trains sales and support teams to use Dynamics 365 effectively for customer lifecycle operations. Participants learn process patterns for opportunity management, request handling, and service case tracking.

Beginner

2-3 Days

Beginner

2-3 Days

MICROSOFT DYNAMICS 365 & POWER PLATFORM SOLUTIONS

Dynamics 365 CRM Functional Consultant

This functional track prepares participants to configure and operate Dynamics 365 CRM in real business environments. The program covers core application setup, process automation, and configuration standards for customer-facing operations.

Beginner to Intermediate

3-5 Days

Beginner to Intermediate

3-5 Days

MICROSOFT DYNAMICS 365 & POWER PLATFORM SOLUTIONS

Dynamics 365 + Power Platform Integration

This integration course focuses on designing and implementing end-to-end business solution connectivity across Dynamics 365 and Power Platform ecosystems. Participants apply integration patterns for automation, data movement, and operation...

Intermediate

2-3 Days

Intermediate

2-3 Days

MICROSOFT DYNAMICS 365 & POWER PLATFORM SOLUTIONS

Dynamics 365 Developer (Customization & Extensions)

This developer-focused course provides end-to-end guidance for extending Dynamics 365 beyond out-of-box features. Participants build custom business logic, integrate with enterprise systems, and apply maintainable extension patterns.

Intermediate to Advanced

CATEGORY

Advanced AI & Machine Learning (Databricks)

2

DATABRICKS GENERATIVE AI (IF APPLICABLE) OR ADVANCED AI SKILLS

Databricks Generative AI & LLM Applications

Advanced

3 Days

This program focuses on enterprise GenAI solution design with Databricks. Participants implement RAG pipelines, optimize prompts and retrieval strategies, and build deployable LLM applications for business use cases like chat assistants, d...

Advanced

3 Days

High Demand

DATABRICKS MACHINE LEARNING ASSOCIATE / PROFESSIONAL

Databricks Machine Learning

Intermediate to Advanced

3-4 Days

This advanced Databricks program covers end-to-end machine learning implementation from feature engineering to model serving. Participants work with MLflow for experiment tracking and model governance, build and tune models on Spark, and c...

AI Coding

12

AIC-100

AI Coding Agents for Engineering Leaders

Beginner

4 hours

Engineering leaders evaluate Copilot, Cursor, Claude Code, Codex, and related agentic tools under pressure to improve throughput without sacrificing security or quality. This VNode-designed session frames decision criteria, governance guar...

Beginner

4 hours

AIC-110

AI Coding Agents Foundations

Beginner

8 hours

Developers learn how modern coding agents read context, propose edits, run tools, and fail. The program builds habits for prompting with intent, reviewing diffs critically, and keeping humans accountable for merges. Labs use representative...

Beginner

8 hours

AIC-320

Agentic DevSecOps Engineering

AIC-320 extends AI coding into CI/CD, policy-as-code, secret scanning response, and secure change automation. Participants design agent-assisted DevSecOps flows that preserve auditability and human approval for production risk. VNode enter...

Intermediate

16 hours

Intermediate

16 hours

AIC-200

Agentic Software Development Lifecycle Practitioner

This practitioner program embeds coding agents into backlog refinement, design notes, implementation, code review, test authoring, and release checklists. Teams leave with an agentic SDLC playbook tailored to their delivery cadence. VNode-...

Intermediate

16 hours

Intermediate

16 hours

AIC-300

Enterprise Developer AI Champion Program

AIC-300 is a VNode enterprise academy path for nominated champions. Participants deepen multi-tool fluency, facilitation skills, governance literacy, and enablement planning so they can run office hours, pattern libraries, and cohort coach...

Intermediate

24 hours

Intermediate

24 hours

AIC-210

Model Context Protocol Developer

MCP connects agents to tools, resources, and prompts. This VNode developer program covers protocol primitives, server implementation patterns, authentication boundaries, and enterprise allowlisting concerns. Labs focus on practical interna...

Intermediate

16 hours

Intermediate

16 hours

AIC-310

Multi-Tool Engineering: Copilot, Cursor, Claude Code and Codex

Enterprises rarely standardize on a single AI coding tool forever. This VNode program builds comparative fluency across Copilot, Cursor, Claude Code, and Codex — strengths, administration surfaces, context models, and when to choose each....

Intermediate

16 hours

Intermediate

16 hours

AIC-220

Secure AI Coding and Governance

Security and engineering leaders need enforceable policy for AI coding without blocking adoption. This program covers repository classification, secrets handling, model and training opt-out positions, agent execution boundaries, and eviden...

Intermediate

12 hours

Intermediate

12 hours

AIC-230

AI-Assisted Testing, Review and Quality Engineering

Quality engineering changes when agents generate tests and suggest reviews. This program teaches risk-based test strategies, AI-assisted review checklists, flaky-test triage patterns, and how to reject low-value generated coverage. VNode-d...

Intermediate

12 hours

Intermediate

12 hours

AIC-250

Developer Productivity, Evaluation and ROI

AI coding ROI claims often overfit to vanity metrics. This VNode session defines baselines, leading/lagging indicators, experiment design for pilots, and how to report outcomes without hype. Leaders leave with a measurement plan tied to de...

Intermediate

8 hours

Intermediate

8 hours

AIC-240

Legacy Modernization with AI Coding Agents

Legacy systems resist change when context is tribal and tests are thin. This VNode program shows how agents help with code archaeology, characterization tests, strangler patterns, and documentation recovery — while enforcing human gates fo...

Intermediate

16 hours

Intermediate

16 hours

AIC-120

Prompt and Context Engineering for Coding Agents

Most AI coding failures are context failures. This VNode program teaches engineers how to encode goals, constraints, done-when criteria, and project conventions into reusable prompts, rules files, and AGENTS.md-style guidance. Participants...
