CERTIFICATION

Microsoft Applied Skills credential

AUDIENCE PROFILE

Who This Program Is For

Built for Administrator learners validating applied skill in Azure Monitor, Azure Virtual Machines, Azure Virtual Network, Windows Server.

PROGRAM SUMMARY

What This Course Covers

To earn this Microsoft Applied Skills credential, learners demonstrate the ability to deploy and configure monitoring for Azure infrastructure.

TAILORED DELIVERY

Adapt the program around your team.

This outline can be adapted for virtual, on-site, or hybrid delivery, with emphasis adjusted for your team's platform priorities, role mix, and implementation goals.

Enterprise-ready delivery format

VNode ITeS can align labs, examples, delivery pace, and assessment checkpoints to the required audience profile while preserving the official program sequence where applicable.

COMPLETE MODULE SEQUENCE

Module Flow and Topic Coverage

The structure below presents the current delivery flow for this program, including the associated topics covered under each module.

Plan the next session

We can tune this outline around your delivery goals and team mix.

MODULE 1

Deploy and configure Azure Monitor

In this learning path, you learn to deploy and configure Azure Monitor, including creating a Log Analytics workspace, and configuring monitoring for applications, virtual machines, and virtual networks. You also learn to create and configure alerts and responses. Finally, you practice these skills in a guided lab project.

- Create and configure a Log Analytics workspace
- Configure monitoring for applications
- Configure monitoring for virtual machines
- Configure monitoring for virtual networks
- Configure alerts and responses
- Guided Project – Deploy and configure Azure Monitor
