

PROFESSIONAL COURSE OUTLINE

Microsoft

MB-335

Dynamics 365 Supply Chain Management Functional Consultant Expert

This course is designed to build your in Dynamics 365 Supply Chain Management application knowledge. This course will cover the most important features and functionalities needed by Dynamics 365 Supply Chain Management functional consultant including: The product information and how to configure, create, and manage your product and inventory. Supply chain management configuration and processing. The transportation management features, and the warehouse management features. Asset Management functionalities. Master planning configuration and processing. Sales and procurement processes. This course includes lectures and several hands-on exercises. The exercises will be introduced to you in the form of a case study presented to a Dynamics 365 Supply Chain Management Functional Consultant, Expert. Each exercise will be based on a business scenario followed by a question or discussion then a step-by-step guidance to perform the system related steps.

AUDIENCE PROFILE

Who This Program Is For

This course is designed for the Dynamics 365 Supply Chain Management Functional Consultant Expert. The Dynamics 365 Supply Chain Management Functional Consultant Expert is a key resource that implements and configures advanced features of Dynamics 365 Supply Chain Management to meet the requirements of a business. The functional consultant analyzes business requirements, translates those requirements into fully realized business processes and solutions, and applies industry-recommended practices to implementations. The functional consultant has a strong advanced knowledge of supply chain management operations including production, master planning, and asset management and demonstrates expertise in one or more of the following manufacturing methods: discrete, process, and lean. They partner with architects, developers, consultants and other stakeholders to implement solutions that meet or exceed the needs of their customers. The consultant identifies use cases for applying Dynamics 365 Supply Chain Management add-ins for mixed reality, internet of things (IoT), and machine learning (ML) technologies. The functional consultant specializes in one or more of the following feature sets of Dynamics: finance, manufacturing, or supply chain management. They partner with architects, developers, administrators, and other stakeholders to deliver solutions that meet or exceed the needs of their customers.

PROGRAM SUMMARY

What This Course Covers

Warning This certification, related exam, and renewal assessments will retire on June 30, 2026.

TAILORED DELIVERY

Adapt the program around your team.

This outline can be adapted for virtual, on-site, or hybrid delivery, with emphasis adjusted for your team's platform priorities, role mix, and implementation goals.

Enterprise-ready delivery format

VNode ITeS can align labs, examples, delivery pace, and assessment checkpoints to the required audience profile while preserving the official program sequence where applicable.

COMPLETE MODULE SEQUENCE

Module Flow and Topic Coverage

The structure below presents the current delivery flow for this program, including the associated topics covered under each module.

**Plan the next session**

We can tune this outline around your delivery goals and team mix.

MODULE 1

Configure and manage products and inventory in Dynamics 365 Supply Chain Management

Product information is the pillar of supply chain and retail applications across all industries. In the various modules of a business solution, product-specific information and configuration are required to manage the business processes that are related to products, product families, bills of materials, and product categories. Inventory reports show you in a variety of ways how much inventory you have and explain how to be more effective in your inventory investments.

- Get started with Dynamics 365 Supply Chain Management
- Get started with inventory management in Dynamics 365 Supply Chain Management
- Work with inventory management operations in Dynamics 365 Supply Chain Management
- Set up and work with outbound operations using inventory management in Dynamics 365 Supply Chain Management
- Set up and work with inbound operations using inventory management in Dynamics 365 Supply Chain Management
- Set up and work with inventory control in Dynamics 365 Supply Chain Management
- Use inventory reports in Dynamics 365 Supply Chain Management
- Create products and product masters in Dynamics 365 Supply Chain Management
- Create bill of materials in Dynamics 365 Supply Chain Management

2

MODULE 2

Configure and use discrete manufacturing in Dynamics 365 Supply Chain Management

If a company only produces simple products, production can be scheduled manually with the correct bill of materials (BOM) parts arriving on the production floor, at the correct time, and at the proper resource. As a functional consultant for manufacturing, you need to know how to configure Dynamics 365 Supply Chain Management for discrete manufacturing, so your customer can perform and control the production lifecycle.

- Get started with production control in Dynamics 365 Supply Chain Management
- Get started with discrete manufacturing in Dynamics 365 Supply Chain Management
- Set up and use production control for discrete manufacturing in Dynamics 365 Supply Chain Management
- Set up and use discrete manufacturing routes in Dynamics 365 Supply Chain Management
- Set up and use discrete manufacturing resources in Dynamics 365 Supply Chain Management
- Set up products for production for discrete manufacturing in Dynamics 365 Supply Chain Management
- Production costing for discrete manufacturing in Dynamics 365 Supply Chain Management
- Work with the costing sheet in Dynamics 365 Supply Chain Management
- Work with capacity planning and scheduling in Dynamics 365 Supply Chain Management
- Work with manufacturing execution in Dynamics 365 Supply Chain Management
- Set up configurable products in Dynamics 365 Supply Chain Management
- Validate and release product configuration models in Dynamics 365 Supply Chain Management
- Work with configurable products in Dynamics 365 Supply Chain Management

**Plan the next session**

We can tune this outline around your delivery goals and team mix.

3

MODULE 3

Configure and use process manufacturing in Dynamics 365 Supply Chain Management

Process manufacturing is associated with formulas and manufacturing recipes, in contrast with discrete manufacturing, which uses discrete units, and bills of materials. Process manufacturing is used in manufacturing environments where production is completed in batch or semi-continuous processes.

- Get started with production control in Dynamics 365 Supply Chain Management
- Configure process manufacturing in Dynamics 365 Supply Chain Management
- Configure formulas for process manufacturing in Dynamics 365 Supply Chain Management
- Identify and configure batch attributes for process manufacturing in Dynamics 365 Supply Chain Management
- Work with commodity pricing and compliance in Dynamics 365 Supply Chain Management

4

MODULE 4

Set up engineering change management for Dynamics 365 Supply Chain Management

Learn how to set up engineering change management for Dynamics 365 Supply Chain Management.

- Get started with Engineering Change Management for Dynamics 365 Supply Chain Management
- Set up versioned products in Dynamics 365 Supply Chain Management
- Configure engineering change management for Dynamics 365 Supply Chain Management
- Convert an existing product to an engineering product in Dynamics 365 Supply Chain Management

5

MODULE 5

Use export control in Dynamics 365 Supply Chain Management

Ensure compliance with international regulations by defining and validating export rules using an advanced export control system.

- Work with export control in Dynamics 365 Supply Chain Management
- Extend export control in Dynamics 365 Supply Chain Management

6

MODULE 6

Configure and work with warehouse management in Dynamics 365 Supply Chain Management

Warehouse management in Dynamics 365 Supply Chain Management helps optimize and streamline warehouse processes according to your individual needs and provides the insight into your inventory and the tools to help increase customer satisfaction and reduce costs.

- Configure warehouse management in Dynamics 365 Supply Chain Management
- Warehouse implementation experience in Dynamics 365 Supply Chain Management
- Inbound warehouse operations using Dynamics 365 Supply Chain Management
- Outbound warehouse operations using Dynamics 365 Supply Chain Management
- Execute across warehouse operations in Dynamics 365 Supply Chain Management
- Warehouse management mobile device configuration using Dynamics 365 Supply Chain Management

7

MODULE 7

Use warehouse management in manufacturing in Dynamics 365 Supply Chain Management

Using warehouse management in manufacturing processes in Dynamics 365 Supply Chain Management helps optimize and streamline warehouse processes in your manufacturing environment, according to your company's needs.

- Configure warehouse management in Dynamics 365 Supply Chain Management
- Warehouse implementation experience in Dynamics 365 Supply Chain Management
- Inbound warehouse operations using Dynamics 365 Supply Chain Management
- Outbound warehouse operations using Dynamics 365 Supply Chain Management
- Execute across warehouse operations in Dynamics 365 Supply Chain Management
- Warehouse management mobile device configuration using Dynamics 365 Supply Chain Management
- Use warehouse management for manufacturing in Dynamics 365 Supply Chain Management

8

MODULE 8

Configure and use lean manufacturing in Dynamics 365 Supply Chain Management

Lean manufacturing is a journey of continuous improvement. The goal is to produce exactly what the customer wants, when the customer wants it, and to do it economically. You can use lean manufacturing in a unified (mixed-mode) manufacturing environment that combines various supply, production, and sourcing strategies. These strategies include production orders, batch orders for process industries, purchase orders, and transfer orders. The lean manufacturing architecture in Dynamics 365 Supply Chain Management consists of production flows, activities, and Kanban rules.

- Get started with production control in Dynamics 365 Supply Chain Management
- Get started with lean manufacturing in Dynamics 365 Supply Chain Management
- Set up lean manufacturing in Dynamics 365 Supply Chain Management
- Create and process fixed kanbans in Dynamics 365 Supply Chain Management
- Create and process event kanban rules in Dynamics 365 Supply Chain Management
- Create and process scheduled kanbans in Dynamics 365 Supply Chain Management
- Configure activity-based subcontracting and production flow costing in Dynamics 365 Supply Chain Management

9

MODULE 9

Configure and manage procurement and vendors in Dynamics 365 Supply Chain Management

The process of finding and working with vendors, purchasing products, and ensuring the quality of goods and services are all important factors that impact a company's reputation and success.

- Configure and perform the procure-to-purchase process in Dynamics 365 Supply Chain Management
- Configure and manage vendor collaboration in Dynamics 365 Supply Chain Management
- Process purchase orders in Dynamics 365 Supply Chain Management
- Set up and work with quality control and quality management in Dynamics 365 Supply Chain Management
- Configure and use agreements in Dynamics 365 Supply Chain Management
- Set up intercompany trade in Dynamics 365 Supply Chain Management
- Work with intercompany trade in Dynamics 365 Supply Chain Management

**Plan the next session**

We can tune this outline around your delivery goals and team mix.

10

MODULE 10

Configure and manage sales, and customers in Dynamics 365 Supply Chain Management

The process of working with customers, understanding the life cycle of the sales process, and setting up sales agreements are all important factors that impact a company's success.

- Set up order to cash in Dynamics 365 Supply Chain Management
- Work with order to cash in Dynamics 365 Supply Chain Management
- Configure and use agreements in Dynamics 365 Supply Chain Management
- Set up intercompany trade in Dynamics 365 Supply Chain Management
- Work with intercompany trade in Dynamics 365 Supply Chain Management

11

MODULE 11

Master planning in Dynamics 365 Supply Chain Management

Master planning allows companies to determine and balance the future need for raw materials and capacity to meet company goals.

- Set up Master Planning in Dynamics 365 Supply Chain Management
- Use master planning in Dynamics 365 Supply Chain Management
- Demand Driven Material Requirements Planning in Dynamics 365 Supply Chain Management
