## DURATION

2 days

## CERTIFICATION

Microsoft Certified: Power Platform Fundamentals

## AUDIENCE PROFILE

## Who This Program Is For

This course helps learners understand how Microsoft Power Platform technologies can be used to develop tailored business solutions. It covers how to optimize the use of data by using Microsoft Dataverse and connectors and accelerate business outcomes by using Microsoft Power Apps for low code/no code solutions. Additionally, it covers how to improve processes by using Microsoft Power Automate, enable customer self-service by using Microsoft Power Pages, and boost productivity by using copilots. This course is intended for those seeking to start their journey building solutions with Microsoft Power Platform.

## PROGRAM SUMMARY

## What This Course Covers

As a candidate for this certification, you aspire to understand how Microsoft Power Platform technologies can be used to: Develop tailored business solutions.

## TAILORED DELIVERY

## Adapt the program around your team.

This outline can be adapted for virtual, on-site, or hybrid delivery, with emphasis adjusted for your team's platform priorities, role mix, and implementation goals.

### Enterprise-ready delivery format

VNode ITeS can align labs, examples, delivery pace, and assessment checkpoints to the required audience profile while preserving the official program sequence where applicable.

## COMPLETE MODULE SEQUENCE

## Module Flow and Topic Coverage

The structure below presents the current delivery flow for this program, including the associated topics covered under each module.

### Plan the next session

We can tune this outline around your delivery goals and team mix.

1

## MODULE 1

**Describe the business value of Microsoft Power Platform**

This learning path serves as an introduction to the Power Platform. It discusses the Power Platform components: Power BI, Power Apps, Power Automate, Power Pages and Microsoft Copilot Studio. It covers Microsoft Dataverse as the common data foundation, and connectors that allow Power Platform apps to access a vast list of data sources. The learning path also discusses Power Platform's native integration with Microsoft 365 services, its ability to connect to on-premises systems, and the capabilities of the Plan Designer. PL-900

- Describe the business value of Microsoft Power Platform services
- Describe the business value of extending business solutions by using Microsoft Power Platform

2

## MODULE 2

**Manage the Microsoft Power Platform environment**

This learning path covers the Microsoft Power Platform environment, equipping users with Dataverse—a scalable, secure data platform that supports relational data, business logic, and lifecycle management. It enables easy creation and modification of tables, relationships, and data flows. Additionally, it provides robust governance through role-based security, environment segmentation, admin centers, and compliance features, all supporting secure data handling and streamlined application lifecycle management (ALM). PL-900

- Describe Microsoft Dataverse
- Describe Microsoft Power Platform administration and governance

3

## MODULE 3

**Demonstrate the capabilities of Microsoft Power Pages**

This learning path focuses on Microsoft Power Platform. Learners are introduced to the business capabilities of Power Pages sites and their security features. Learners then learn how to build a Power Pages site, including a hands-on exercise. PL-900

- Describe the capabilities of Microsoft Power Pages
- Create a Microsoft Power Pages site

4

## MODULE 4

**Demonstrate the capabilities of Microsoft Power Apps**

This learning path introduces learners to Power apps. This includes a general discussion of capabilities and then specific focus on canvas apps and model-driven apps. PL-900

- Identify basic Microsoft Power Apps capabilities
- Build a canvas app
- Build a model-driven app

**Plan the next session**

5

## MODULE 5

**Demonstrate the capabilities of Microsoft Power Automate**

This learning path introduces makers to Power Automates cloud and desktop flows, covering key concepts like triggers, actions, loops, and branching. Learners explore real-world use cases across Microsoft 365 apps, leverage Copilot to build and describe flows, and gain hands-on experience with testing, monitoring, and sharing automations. The path also includes an introduction to Process Mining and desktop automation using Power Automate for Desktop. PL-900

- Identify Microsoft Power Automate components
- Build a Microsoft Power Automate flow
