# Secure AI solutions in the cloud using Microsoft Defender for Cloud and Microsoft Entra

Official Microsoft Learn-aligned instructor-led program for Secure AI solutions in the cloud using Microsoft Defender for Cloud and Microsoft Entra.

Security

Intermediate

Azure

DURATION

1 day

LEVEL

Intermediate

FORMAT

Virtual, On-site, or Hybrid

CERTIFICATION

SC-5009

AUDIENCE PROFILE

## Built for these roles

This course is intended for professionals responsible for securing and operating AI workloads in the cloud. The audience includes cloud security engineers, platform engineers, and application teams working with AI services who need to understand how workload protection, security posture, and identity controls apply to AI environments. Familiarity with Azure, cloud-native security concepts, and basic identity and access principles is recommended.

OVERVIEW

## Executive overview

Secure AI solutions in the cloud by configuring AI workloads, applying cloud-native protections, and reinforcing security outcomes with identity controls. Learn how AI workloads authenticate, how trust boundaries are established, and how security posture and workload protection reduce risk using Microsoft Defender for Cloud and Microsoft Foundry. Extend these protections by using Microsoft Entra to design and apply identity and access controls that explain and harden earlier security decisions. Learning outcomes: - Apply security posture management and workload protection for AI services using Microsoft Defender for Cloud - Configure and secure Microsoft Foundry environments using cloud-native security controls - Design and apply identity and access controls for AI workloads using Microsoft Entra

PROGRAM OUTCOMES

## Capabilities your teams will gain

- Strengthen capability in security scenarios
- Strengthen capability in azure scenarios
- Strengthen capability in role-based scenarios

TALK TO US

OFFICE

## ENTERPRISE CUSTOMIZATION

### Enterprise customization

Tailor this program to your organization's priorities: Builds current Microsoft credential readiness for Secure AI solutions in the cloud using Microsoft Defender for Cloud and Microsoft Entra using the official Microsoft Learn outline.

#### Customization options

- Align labs to your production environment and platform priorities
- Add readiness reviews and instructor-led practice sessions
- Extend into project-specific architecture or delivery coaching

## CURRICULUM

### Curriculum roadmap

1

#### MODULE 1

### Protect Microsoft Foundry solutions by using Microsoft Defender for Cloud

Learn how to secure Microsoft Foundry workloads by using Microsoft Defender for Cloud. Discover AI resources across Azure, assess their security posture, protect against runtime threats, and configure model guardrails in Microsoft Foundry to prevent unsafe or policy-violating content.

- Understand how Microsoft Defender for Cloud supports AI security and governance in Azure
- Protect AI workloads with Microsoft Defender for Cloud
- Configure and manage guardrails in Microsoft Foundry
- Secure Microsoft Foundry environments

2

#### MODULE 2

### Secure AI identity infrastructure with Microsoft Entra

Learn how to secure identities used by AI workloads in Azure. Build skills in workload identity architecture, access management, Conditional Access, and identity risk response by using Microsoft Entra.

- Understand identity architecture for AI workloads
- Implement access management for Azure resources
- Plan, implement, and administer Conditional Access
- Manage Microsoft Entra Identity Protection
